

# sensedia

## SOA that makes sense!

Sensedia offers products that enable enterprises to manage and reuse their SOA (Service Oriented Architecture) and software development assets. SOA makes sense with Sensedia by reducing duplicated development, accelerating the return on investment and improving SOA governance through the identification, creation, management and quality analysis of assets.

The company has a history of success cases, large clients and mature products that are easily customized to meet clients' specific needs. The company counts on highly qualified professionals and large investments in research and development.
